

## WORLD ROSARY DAY 2024

### VIDEO RECORDINGS / TECHNICAL DETAILS

We would need these video recordings to be shot in HD quality.

If you have a camera with a microphone, it would be ideal.

The camera should be set on a tripod.

Alternatively, you could use a smartphone

if possible, please use quick toggles in Cinematic mode to switch between HD or 4K and 24, 25, or 30 fps.

Less recent smartphones offer 1080p and 720p HD.

Please use some lighting.

If you're self recording, place the phone or camera in front of you. Find a location that is well-lit with natural sunlight or plenty of indoor lighting. Avoid side lighting and back lighting.

Both create shadows and are often unflattering. Choose a quiet location with little background noise (street sounds, music, other people).

We remain at your disposal if you need further specifications.
